Smaltolux Hydro is VECHRO's leading line of water-soluble enamels and primers. They are products with outstanding performance and excellent application on all types of wood and metal surfaces. They have ecological and antimicrobial certification as well as certification from the British Allergy Foundation. Smaltolux Hydro is the most responsible choice for both professional and private consumers, for surfaces located in children's rooms or in areas inhabited by people with respiratory problems and allergies.

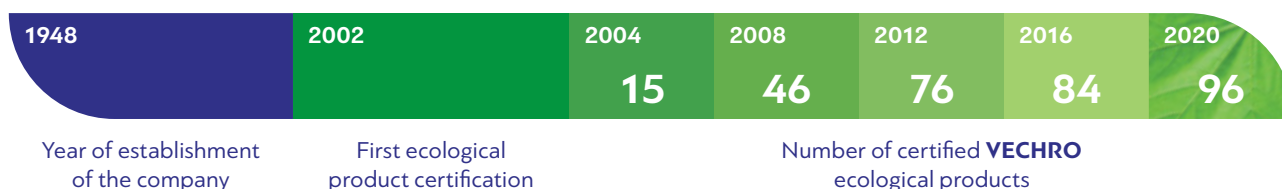

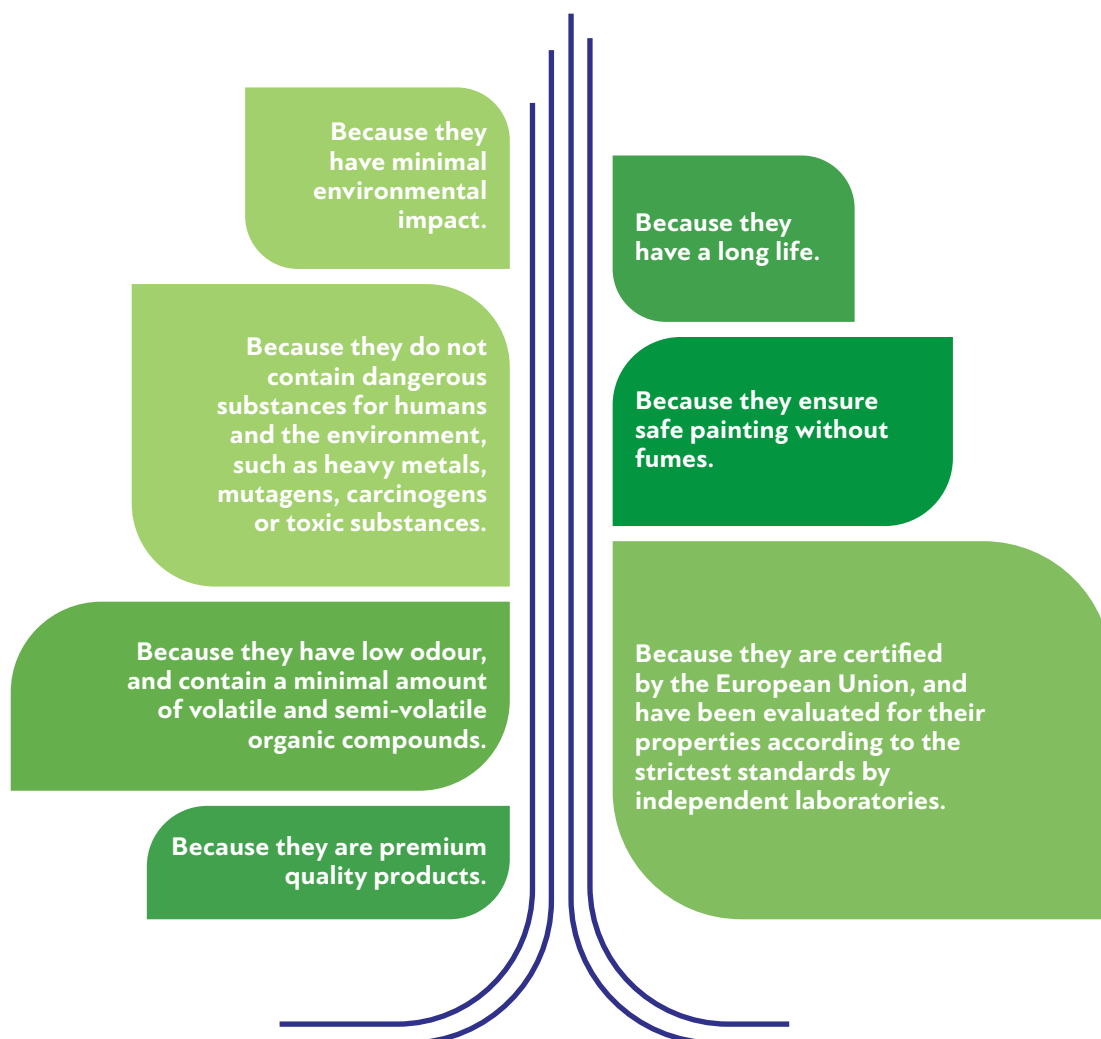

The new Smaltolux Hydro packages

they are designed to make it easier for professional and private consumers to easily choose the right product, based on the type of surface they want to work on and the protection they need. Each package is distinguished by its individual colour and name, clearly illustrating the indicative application surfaces and technical characteristics of each product. Find out more by visiting vechro.gr and look for Smaltolux Hydro at the best paint shops in your area!

A large, abstract background image showing a close-up of a metallic surface, possibly a car body, with a blue and red color scheme. The surface is highly reflective, showing highlights and shadows. Several small, circular rivets or bolts are visible, spaced out along the surface. The overall composition is dynamic and modern.
